

IRWIN CABINET WORKS

Manufacturer of display stands, commercial cabinetry, millwork & metal work

Irwin Cabinet Works Ltd. makes innovative modules for Produce and Bakery display. Our products are manufactured both in wood and metal. They feature the finest materials including selected hardwoods – primarily oak and maple. To ensure quality and consistency of supply, all our metal work is produced in-house.

Our employees are highly skilled and proud of their craftsmanship. Our shops are equipped with a full range of woodworking machinery including advanced CNC milling equipment.

We manufacture in North America for the North American market. When clients bring both complex and simple projects to Irwin they find a refreshing “can do” approach backed by the ability to design, build, and deliver exactly the right product on time.
